Trance Healing

All healing is divine and a gift from God. How it is accessed can take many forms. Trance healing is a passive process which permits Spirit forces to direct specific healing energies to a patient through the mind and aura of a medium. It is a very natural process which can affect the human form on many levels — physically, mentally, emotionally and spiritually.

Auragraph

An Auragraph is an inspirational drawing by a medium who uses their psychic ability and a connection with the Spirit World to access the information which goes into its makeup. It is used to provide a perspective of an individual's pathway in life and their potential future through the interpretation of colors, symbols, and numerology. An Auragraph reading will very often provide insight into a persons personal psychic and spiritual abilities and provide guidance to help them fulfill their potential.

Evidential Mediumship 101

This one day workshop is designed for those who have little or no experience as well as those with some experience who wish to get back to the basics of Mediumship and reinforce their connection with Spirit. This is an opportunity to learn the distinctiveness of true evidence and develop an understanding of the mechanics involved in communicating with the Spirit World. This day will be devoted to guiding you through the process of achieving a higher level of consciousness and opening your senses to new levels of awareness and understanding.
